

YOU CAN BECOME A CITIZEN SCIENTIST

Do you have a waterway flowing through your property?

Do you want to sample your local waterways, either as an individual or with a group?

Join people across the globe and help monitor our fresh waterways

YOU CAN BECOME A CITIZEN SCIENTIST

Do you have a waterway flowing through your property?

Do you want to sample your local waterways, either as an individual or with a group?

Join people across the globe and help monitor our fresh waterways

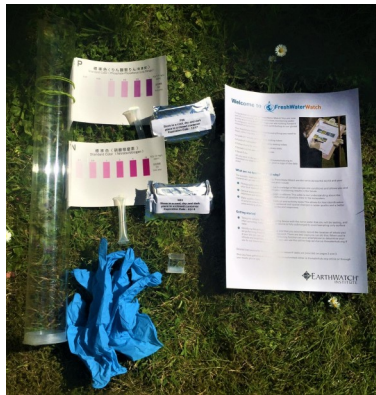

We want you to sample your chosen waterway 4 times per year at the same point with the testing kits we provide.

Then, upload your results to the Freshwater Watch website. As well as helping researchers across the globe, you can see everyone's results for yourself.

Your data helps to:

- Increase scientific data gathering in a robust and consistent manner
- Validate Earth Observations
- Function as an early warning system
- Support agency monitoring
- Create online and open source data

What you will be looking for:

What you will get in your kit:

- 1x set of instructions
- 1x turbidity measuring tube
- 1x pair rubber gloves
- 1x pack of 5 NO₃ testing tubes
- 1x pack of 5 PO₄ testing tubes
- 1x sample cup
- NO₃ and PO₄ colour charts

To get involved contact:

Jo Leigh at FWAG: joanne.leigh@fwagsw.org.uk 01666 503668
